Report for: ChemoCentryx (NASDAQ: CCXI)

CCXI shares are rising today on news of a potentially lucrative licensing agreement. The company has also released its Q1 financial report.

Vifor Pharma, a company of Galenica Group, and ChemoCentryx, Inc. ([CCXI](#)), a biopharmaceutical company developing orally-administered therapeutics to treat autoimmune diseases, inflammatory disorders and cancer, announced today that Vifor Pharma has licensed rights to commercialize CCX168, a Complement 5a Receptor (C5aR) inhibitor ready for Phase 3 development for orphan and rare renal diseases, in Europe, Canada, Mexico, Central and South America and South Korea.

Under the terms of the agreement, ChemoCentryx will receive an upfront payment of USD 60 million in cash and a USD 25 million equity investment to purchase ChemoCentryx common stock at a price of USD 7.50 per share. CCXI shares have not traded in that range this year. ChemoCentryx will be eligible to receive additional payments on the achievement of certain regulatory and sales-based milestones, as well as tiered double-digit royalties on net sales of CCX168 in the licensed territories.

CCX168 is being developed by ChemoCentryx for the treatment of conditions including but not limited to anti-neutrophil cytoplasmic antibody (ANCA)-associated vasculitis (AAV) and has obtained orphan drug status in the US and Europe. This disease affects approximately 40,000 people in the US, with around 4,000 new cases identified each year, and more than 75,000 people in Europe, with at least 7,500 new cases each year. It is currently treated with courses of non-specific immuno-suppressants (cyclophosphamide or rituximab), combined with high-dose corticosteroid administration.

## **First Quarter 2016 Financial Results and Outlook**

Cash, cash equivalents and investments totaled \$65.3 million at March 31, 2016, excluding the \$85.0 million upfront payment in connection with the partnership with Vifor Pharma announced earlier today.

Research and development expenses were \$11.2 million for the three months ended March 31, 2016 compared to \$8.4 million reported for the same period in 2015. The increase in research and development expense from 2015 to 2016 was primarily attributable to higher costs associated with CCX168, the Company's C5aR inhibitor, due to the completion of ancillary Phase I studies to support anticipated end of Phase II meetings with regulatory agencies and higher expenses associated with CCX872, the Company's second CCR2 inhibitor, for the ongoing pancreatic cancer trial.

General and administrative expenses were \$4.1 million for the three months ended March 31, 2016 compared to \$3.7 million for the comparable period in 2015. The increase from 2015 to 2016 was primarily due to increases in intellectual property related expenses and travel and professional fees associated with our business development efforts.

Net loss was \$15.2 million for the first quarter ended March 31, 2016 compared to \$12.0 million in the same period in 2015.

Total shares outstanding at March 31, 2016 were approximately 44.3 million shares.
